

BRUSHLESS DC motors & gearmotors

CHARACTERISTICS

- Standard hall effect outputs
- Suitable for low and line voltage applications
- Totally enclosed construction
- High power density
- High starting torque
- Variable speed operation
- Low maintenance
- 20,000+ hours of life
- Can run on AC or DC voltage

CONSIDERATIONS

- Requires control to operate
- Cogging may occur at low speeds
- Rare earth magnets and hall effects increase motor cost

GEAR RATIOS	5:1 - 320:1	5:1 - 1000:1	5:1 - 100:1	5:1 - 1000:1

*Numbers based on optimal gear life at continuous duty

Because Brushless motors are electronically commutated, they require the use of a control to operate. Groschopp BLDC controls are designed and built to work well with the Groschopp line of Brushless DC motors and gearmotors.
